The Encyclopedia of War, 5 Volume Set
The Age of Battles
Staging Authority

5-volume reference is a comprehensive print and electronic resource covering the history of warfare from ancient times to the present day, across the entire globe. Arranged in A-Z
format, the Encyclopedia provides an overview of the most important events, people, and terms associated with warfare - from the Punic Wars to the Mongol conquest of China, and the War on Terror; from the Ottoman Sultan, Suleiman 'the Magnificent', to the Soviet Military Commander, Georgi Konstantinovich Zhukov; and from the crossbow to chemical warfare. Individual entries range from 1,000 to 6,000 words with the longer, essay-style contributions giving a detailed analysis of key developments and ideas. Drawing on an experienced and internationally diverse editorial board, the Encyclopedia is the first to offer readers at all levels an extensive reference work based on the best and most recent scholarly research. The online platform further provides interactive cross-referencing links and powerful searching and browsing capabilities within the work and across Wiley-Blackwell’s comprehensive online reference collection. Learn more at www.encyclopediaofwar.com. Selected by Choice as a 2013 Outstanding Academic Title Recipient of a 2012 PROSE Award honorable mention Vauban and the French Military Under Louis XIV MIT Press "Vauban built a formidable ring of fortresses to protect France's national frontiers and was also
a gifted economist, author, and political strategist. Covers his exceptional career (within the background of Louis XIV's reign) and lasting influences in France and other nations, with illustrations of 17th century bastioned fortification, artillery, and siege warfare contributions, some still standing"-- Provided by publisher.

The New Method of Fortification, as Practised by ... de Vauban ... With an Explication of All Terms Appertaining to that Art. Made English [by A. Swall]. ... Second Edition. In which is Added, Exact Draughts of Dunkirk, Maestricht, Etc Princeton University Press

Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history. This is not a who's who. Instead, each entry provides an in-depth essay on the life and career of the individual concerned. Essays commence with a quick reference section that provides basic facts on the individual's life and achievements. The extended biography places the life and works of the individual within an historical context, and the summary at the end of each essay provides a synopsis of the individual's place in history. All entries conclude with a fully annotated bibliography.

The Fortress in the Age
of Vauban and Frederick the Great 1660-1789 Wentworth Press

Staging Authority: Presentation and Power in Nineteenth-Century Europe is a comprehensive handbook on how the presentation, embodiment, and performance of authority changed in the long nineteenth century. It focuses on the diversification of authority: what new forms and expressions of authority arose in that critical century, how traditional authority figures responded and adapted to those changes, and how the public increasingly participated in constructing and validating authority. It pays particular attention to how spaces were transformed to offer new possibilities for the presentation of authority, and how the mediatization of presence affected traditional authority. The handbook’s fourteen chapters draw on innovative methodologies in cultural history and the aligned fields of the history of emotions, urban geography, persona studies, gender studies, media studies, and sound studies.

Baily’s Magazine of Sports and Pastimes
McGill-Queen's Press - MQUP

Sebastien Le Prestre, Marshal Vauban, was one of the greatest military engineers of all time. His complex, highly sophisticated fortress designs, his advanced theories for
the defence and attack of fortified places, and his prolific work as a writer and radical thinker on military and social affairs, mark him out as one of the most influential military minds of the late seventeenth and early eighteenth centuries. Yet no recent study of this extraordinary man has been published in English. James Falkner, in this perceptive and lively new account of Vauban's life and work, follows his career as a soldier from a dashing and brave young cavalry officer to his emergence as a masterful military engineer. And he shows that Vauban was much more than simply a superlative builder of fortresses, for as a leading military commander serving Louis XIV, he perfected a method for attacking fortifications in the most effective way, which became standard practice until the present day. James Falkner's new study will add significantly to the understanding of Vauban's achievements and the impact his work has had on the history of warfare. *Vauban, Builder of Fortresses* Indiana University Press "Vauban under Siege" is the first systematic comparison of the theory of Vaubanian siegecraft with its reality, contrasting military engineering's pursuit of the efficient siege with generals' contradictory search for rapid conquest, purchased at the cost of additional lives. *A Manual of Siegecraft and*
Vauban was the foremost military engineer of France, not only during his lifetime, but also throughout the 18th century when his legacy and methods remained in place almost unchanged. Indeed, his expertise and experience in the construction, defence, and attack of fortresses is unrivalled by any of his contemporaries, of any nationality. In all three of those fields he was a significant innovator and prolific exponent, having planned approximately 160 major defensive projects and directed over 50 sieges. This book provides not only a modern listing of his varied interventions and their fates, but also a wide-ranging discussion of just how and why they pushed forward the international boundaries of the arts of fortification.

Construction of Vauban's first system, 6 drawings with instructions

Avoir servi les armées françaises pendant pas moins de cinquante-deux années ; avoir pris part à près de cinquante sièges victorieux (parmi lesquels ceux de Strasbourg et de Lille) avoir - en qualité de commissaire général des fortifications - "cadenassé" plusieurs dizaines de places et avoir créé neuf villes... Avoir plaidé en faveur du Rappel des huguenots peu de temps après la révocation de l'édit de
Nantes et conçu le projet d'une Dîme royale pour réformer une fiscalité aussi injuste qu'incohérente autant de titres qui ont valu à Sébastien Le Prestre, sieur de Vauban (1633-1717), une gloire et une popularité inentamées qui l'ont pour ainsi dire momifié et ont permis de forger une légende dorée n'a-t-on pas fini par faire de ce serviteur zélé de la monarchie absolue un devancier des Lumières, de cet artisan du "pré carré" louisquatorziens l'un des premiers théoriciens des frontières naturelles et de ce soldat inflexible une sorte de saint laïc ? On en oublie les efforts déployés dès son jeune âge par un rejeton de la petite noblesse du Morvan pour accéder aux plus hautes charges et s'intégrer aux grandes clientèles de la Cour, solliciter grades et gratifications, arrondir son domaine morvandiau, allier ses filles à des familles huppées (en cela il ne diffère guère des autres grands commis de Louis XIV). Ce n'est pas diminuer les mérites et le rôle de Vauban que - grâce à des documents jusque-là inexploités - de le replacer dans son milieu, dans son cadre de vie, dans les mentalités de son temps. C'est au contraire donner tout son sens et toute sa singularité à l'œuvre d'un stratège authentique, d'un ingénieur et architecte aux vues révolutionnaires, d'un organisateur infaillible,
d'un observateur attentif des réalités sociales et économiques d'une France parcourue en tous sens des décennies durant. Démêler la part de vérité et la part de légende relatives à un personnage aussi incontesté que Vauban, c'est enfin envisager l'histoire militaire du Grand Siècle d'un œil radicalement nouveau. Parue pour la première fois en 1996, cette biographie est devenue l'ouvrage "classique" sur Vauban. En voici une nouvelle édition revue et corrigée, à l'occasion de l'année Vauban célébrée par de nombreuses institutions françaises et internationales.

Vauban Under Siege

"[A] vivid and well written account of the life of the man who built some of the most magnificent military structures known to man."—Clayton Donnell, “Fortress Archaeologist”

Sebastien Le Prestre, Marshal Vauban, was one of the greatest military engineers of all time. His complex, highly sophisticated fortress designs, his advanced theories for the defense and attack of fortified places, and his prolific work as a writer and radical thinker on military and social affairs, mark him out as one of the most influential military minds of the late seventeenth and early eighteenth centuries. Yet no recent study of this extraordinary man has been published in English. James Falkner, in this perceptive and
lively new account of Vauban’s life and work, follows his career as a soldier from a dashing and brave young cavalry officer to his emergence as a masterful military engineer. And he shows that Vauban was much more than simply a superlative builder of fortresses, for as a leading military commander serving Louis XIV, he perfected a method for attacking fortifications in the most effective way, which became standard practice until the present day. Falkner’s new study will add significantly to the understanding of Vauban’s achievements and the impact his work has had on the history of warfare. “A very enjoyable read for those looking for a good, basic account of Vauban’s career and his role in the wars of Louis XIV and of fortification more generally. Its usefulness is enhanced by various maps and reproductions of portraits of key characters and of contemporary plans of fortresses.”—War in History Makers of Modern Strategy from Machiavelli to the Nuclear Age Casemate Publishers This scarce antiquarian book is a facsimile reprint of the original. Due to its age, it may contain imperfections such as marks, notations, marginalia and flawed pages. Because we believe this work is culturally important, we have made it available as part of our
commitment for protecting, preserving, and promoting the world's literature in affordable, high quality, modern editions that are true to the original work.

**Vauban and the French Military Under Louis XIV**

Routledge

Spanning from the West African coast to the Canadian prairies and south to Louisiana, the Caribbean, and Guiana, France's Atlantic empire was one of the largest political entities in the Western Hemisphere. Yet despite France's status as a nation at the forefront of architecture and the structures and designs from this period that still remain, its colonial building program has never been considered on a hemispheric scale.

Drawing from hundreds of plans, drawings, photographic field surveys, and extensive archival sources, **Architecture and Urbanism in the French Atlantic Empire** focuses on the French state's and the Catholic Church's ideals and motivations for their urban and architectural projects in the Americas. In vibrant detail, Gauvin Alexander Bailey recreates a world that has been largely destroyed by wars, natural disasters, and fires – from Cap-François (now Cap-Haïtien), which once boasted palaces in the styles of Louis XV and formal gardens patterned after Versailles, to failed utopian cities like Kourou in Guiana. Vividly illustrated with
examples of grand buildings, churches, and gardens, as well as simple houses and cottages, this volume also brings to life the architects who built these structures, not only French military engineers and white civilian builders, but also the free people of colour and slaves who contributed so much to the tropical colonies. Taking readers on a historical tour through the striking landmarks of the French colonial landscape, Architecture and Urbanism in the French Atlantic Empire presents a sweeping panorama of an entire hemisphere of architecture and its legacy.

Presses Univ. Franche-Comté

A man of inventiveness, versatility and reformist ideas, Marshal Sébastien Le Preste de Vauban built a formidable ring of fortresses to protect France’s national frontiers. More than just a fortification designer, Vauban was also a gifted economist, author, and political strategist. This book tells the complete story of Vauban’s exceptional career, placing him within the framework of Louis XIV’s reign and revealing his lasting influences in France and other nations. With the aid of numerous detailed drawings, 17th century bastioned fortification, artillery, and seige warfare are described in detail. Vauban’s fortifications that are still standing
today are particularly highlighted. *Marshal Vauban and the Defence of Louis XIV's France* Pen & Sword Military

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc.

Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Vauban, Montalembert, Carnot McFarland

The essays in this volume analyze war, its
strategic characteristics and its political and social functions, over the past five centuries. The diversity of its themes and the broad perspectives applied to them make the book a work of general history as much as a history of the theory and practice of war from the Renaissance to the present. Makers of Modern Strategy from Machiavelli to the Nuclear Age takes the first part of its title from an earlier collection of essays, published by Princeton University Press in 1943, which became a classic of historical scholarship. Three essays are reprinted from the earlier book; four others have been extensively revised. The rest--twenty-two essays--are new. The subjects addressed range from major theorists and political and military leaders to impersonal forces. Machiavelli, Clausewitz, and Marx and Engels are discussed, as are Napoleon, Churchill, and Mao. Other essays trace the interaction of theory and experience over generations--the evolution of American strategy, for instance, or the emergence of revolutionary war in the modern world. Still others analyze the strategy of particular conflicts--the First and Second World Wars--or the relationship between technology, policy, and war in the nuclear age. Whatever its theme, each essay places the specifics of military thought and action in their political, social, and economic
environment. Together the contributors have produced a book that reinterprets and illuminates war, one of the most powerful forces in history and one that cannot be controlled in the future without an understanding of its past.

Chambers's *Encyclopædia* BRILL

In 1521, England is at peace under the magnificent Cardinal Wolsey, who rules the country while Henry
VIII spends his time in masques, banquets and hunting, whether it be the fleet-footed deer or the even more delicious quarry of the silken-garbed ladies of the court. But Richard Falconer, chief secretary of the English embassy in Paris, has been found mysteriously murdered. Wolsey believes that Falconer's death is connected with the disturbing news that there is a spy in the English court, or in its embassy in Paris, passing information to King Francis I of France. He summons his nephew, Benjamin Daunbey, and the wayward Roger Shallot to investigate. The only clue is the spy's code name, 'Raphael'. King Henry has secret instructions of his own before the pair journey to Paris: to retrieve a precious ring, the subject of a wager, and a certain book that the King does not want to fall into enemy hands. They are not to return to England without them. This novel was previously published under the pseudonym Michael Clynes.

The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the
largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. Delve into what it was like to live during the eighteenth century by reading the first-hand accounts of everyday people, including city dwellers and farmers, businessmen and bankers, artisans and merchants, artists and their patrons, politicians and their constituents. Original texts make the American, French, and Industrial revolutions vividly contemporary.

The Vauban Fortifications of France Springer

The later seventeenth and eighteenth centuries have been acclaimed as the classic period of artillery fortification. This was an era when fortresses and fortress systems shaped the calculations of strategists and statesmen, and often dictated the course of
campaigns. The age was one of almost constant conflict and this book, originally published in 1985, explores the influence of the fortress in the dynastic wars of Bourbon, Habsburg and Hohenzollern, the contest for influence in the Baltic, the last crusades of the West against the Turks, and in the peculiar conditions of colonial campaigning and the War of the American Independence.

The Army and Navy Magazine Gale Ecco, Print Editions

The subject of earth pressure is one of the oldest and most extensive chapters in soil mechanics and foundation engineering and is one of the pillars of structural engineering. First the development of earth pressure theory is comprehensively described. The descriptions range from the first approaches to the determination of earth pressure through continuum mechanical earth pressure models to the integration of earth pressure research into the disciplinary structure of geotechnics. The main part of the book comprises a selection of current calculation basics. The aim is to provide a collection of working instructions for foundation and structural engineers in construction companies, consultants and in building supervision as well as students. In order to further theoretical understanding, the essential basics of the determination of earth
pressure are first presented. Then the most important processes for active and passive earth pressure and at-rest earth pressure for practical application are dealt with, with spatial effects also being taken into account. The book sets out to provide brief information about rarely encountered questions with references to further literature. In recent years, the dependency of earth pressure on displacement has been paid ever more attention. This applies not just to the passive case. Questions are repeatedly passed to the DIN committee "calculation processes". A selection of these is dealt with in the commentary to DIN 4085, which came out in September 2018. The history of earth pressure theory is supplemented by 40 selected short biographies of scientists and practical engineers, who have taken up the subject and further developed it over the years. The book also has two appendices with terms, formula symbols and indices as well as earth pressure tables.
